

Kathy's Home Needs...

2 bedrooms, about 1000 square feet, dry basement useable for storage, A/C is preferred, and I love old architecture—well acquainted with the joys and frustrations of century-old homes. For renting, that's about it... I need to keep my rent \$800 or below until my farm sells, and I'm willing to live in a house on a corporate farm. I'm not a fan of carpet, and prefer hardwood/wood floors. My "kids" need to be allowed to live there also.

The "kids" in order of age (mostly), and therefore wisdom...

**Isabella(Izzy)** 13 year old grey spayed female who pretty much enjoys napping—especially on laps or in the sun. Although, she has some zip still there & occasionally lets me see the “whizzin’ bizzy” side of her.

**Tarantella (Tella)** 7 year old white & black spayed female who is more tomboy than anything else. She lives up to her name (fast Italian dance) and is very adept at catching things that don't belong in the house. Her favorite hobby is wrestling my throw rugs.

**Mr. Peabody** 8 year old neutered male border collie cross rescue. He is very exuberant, and loves attention. He loves playing in the snow when I'm shoveling and burying himself in drifts. He also loves to be vacuumed!

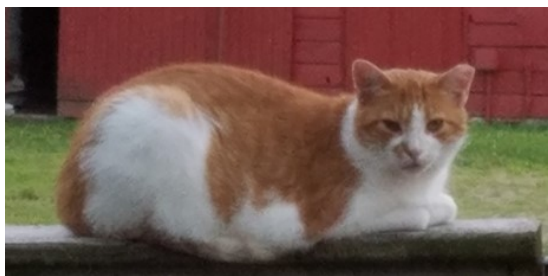

**Pretty** 5 year old black and white spayed female. She is a rescued feral who bonded to me and is a bit shy with others. She loves to be brushed and pet, and generally hang out on the windowsills.

**Ramboli** 3 year old black and white spayed female with a "milk mustache". She is Pretty's daughter but bonded so strongly to me that I had to take her back when I tried to rehome her. She is full of life and loves to play with her toys. She keeps my feet warm at night too!

**Munchkin** 3 year old black and white spayed female. She is also Pretty's daughter which I was unable to re-home as she was too skittish. I don't have a picture, because she is still afraid of the camera. She is making progress, but will always be the cat no one but me, or a select few ever sees.

**Orangie** 5 year old orange and white neutered male. He showed up 3 years ago, and has kept my barn as mouse-free as one cat can. He loves being scratched and brushed, even with the horse curry. He is getting more & more accustomed to other people, and spends a lot of time hanging with the dog or following me around the farm.

**Tasha** 27 year old grey Arab mare. She is a 4H veteran, and is safe with kids, dogs, sheep, etc. She would like to be where she has some other 4-legged company (she doesn't count cats as company) but I would keep her with me if the opportunity presented itself. She is pictured with a young lady who has to wear protective head gear and uses a walker because she falls down so much.
